BUI QUANG AN

Software Developer

I am diligent with a strong work ethic and high performance standards. I manage my time well and adapt to various work settings. My goal is to develop my abilities as a Full-stack developer to produce top-notch applications for iOS and Android, focusing on user experience.

Projects experience

Netcompany Social Suggestion | Tech: MongoDB, NestJs, ReactJs, TailwindCSS

Frontend developer (4 people) | [Demo](#) | [Github](#)

- Contributing to the Frontend website that helps employees find their nearby interesting places supported by more than 1000 people in Netcompany.
- Develop responsive UIs of components including "HomeScreen", "Search Location", "Register and Update location", "Itineraries", etc.
- Architected and implemented robust state management using Redux Toolkit, enhancing app performance and user experience by streamlining state updates and minimizing re-renders.
- Using Pusher service and Google Maps API to develop the "Real-time notifications" and "Get current location" features.

RMITinder | Tech: MongoDB, ExpressJs, ReactJs, TailwindCSS, and NodeJs

Frontend developer (6 people) | [Demo](#) | [Github](#)

Description:

- Implement a mobile-first front-end website dating platform tailored specifically for RMIT University students.
- Utilizing grid systems for optimal visual organization and user experience for "Chat box", "Ideal match", etc.
- Identified and resolved UI bugs in "Chat box" including "Load more message", length of "Chat content card", and unchanged position in chat after clicking the "Load more previous" button in chat.

Bluelist18 | Tech: NextJs, Typescript

Personal | [Demo](#) | [Github](#)

Description:

- Implement the music player will run the song or audio of any videos on YouTube by copying and pasting the video's URL. Also, users can add or delete songs to the playlist and make the playlist loop one or many songs.
- Experience NextJS framework and TypeScript through the project as well as understand how to use YouTube API to get audio links and play music on the website.

VF Corporation | Tech: HTML, CSS, Javascript

Personal | [Demo](#) | [Github](#)

Description:

- This is my first project that I have done since I started to learn about developing websites and it is a game-selling website

Certificates

[Responsive Web Design](#) | [freeCodeCamp](#)

Extra Activities

Actively participated in RMIT Developer Club and Neo Tech Club, fostering a collaborative environment for sharing and advancing technology knowledge among 200 members.

Interests

Coding web and mobile app, Playing sports, Playing guitar

Languages

Full professional proficiency in English, native in Vietnamese
