## Project Experiences

- **My Dictionary || Frontend developer**

(<https://github.com/TuanDao2002/My-Dictionary>)

The project is an iOS English-English dictionary app built by using Swift language with Swift UI framework.

- **Tic tac toe || Individual**

([https://github.com/quangan186/COSC2659\\_Assignment\\_2\\_s3877482](https://github.com/quangan186/COSC2659_Assignment_2_s3877482))

The project is an iOS app based on the Tic tac toe game using Swift language and Swift UI framework.

- **MemeLand || Individual**

(<https://github.com/quangan186/COSC2659-A1>)

This is the first iOS app developed using Swift language and Swift UI framework, and the project is about collecting meme templates from social media applications.

- **RADIOLOGICAL COLLABORATION TOOL || Frontend developer**

(<https://github.com/kaisergrimlock/SEPM-Project/tree/minh-dev>)

The project was developed to support doctors to contact each other through video calls and it was built by using MERN including MongoDB, ExpressJs, ReactJs, and NodeJs.

- **RMITinder || Frontend developer**

(<https://github.com/b1amage/further-web-front-end>)

This is the first MERN project that my teammates and I have developed which was built based on the Tinder app and it was developed by using MongoDB, ExpressJs, ReactJs, and NodeJs.

- **VF Corporation || Individual**

(<https://github.com/quangan186/MindX-project>)

This is my first project that I have done since I started to learn about developing websites. The project is a game-selling website and it was built by using HTML, CSS, and JavaScript
