An Bui

Web Developer

Project Experiences

- My Dictionary || Frontend developer (https://github.com/TuanDao2002/My-Dictionary)

The project is an iOS English-English dictionary app built by using Swift language with Swift UI framework.

- Tic tac toe (https://github.com/quangan186/COSC2659_Assignment2_s3877482)

The project is an iOS app built based on the Tic tac toe game using Swift.

- MemeLand (https://github.com/quangan186/COSC2659-A1)

This is the first project I have used Swift to develop an iOS app and the project is about collecting meme templates from social media applications.

- RADIOLOGICAL COLLABORATION TOOL || Frontend developer (https://github.com/kaisergrimlock/SEPM-Project/tree/minh-dev)

The project was developed for supporting doctors to contact each other through video calls and it was built by using MERN including MongoDB, ExpressJs, ReactJs, and NodeJs.

- RMITinder || Frontend developer (https://github.com/b1amage/further-web-front-end)

This is the first MERN project that my teammates and I have developed which was built based on the Tinder app and it was developed by using MongoDB, ExpressJs, ReactJs, and NodeJs.

- VF Corporation (https://github.com/quangan186/MindX-project)

This is my first project that I have done since I started to learn about developing websites. The project is a game-selling website and it was built by using HTML, CSS, and JavaScript
