BUI QUANG AN

Software Developer

I am a person who works with the highest responsibility, loves to learn more to improve myself, and good at time management. In the future, I want to upgrade myself to become a Full-stack developer for web and mobile app to bring the top-notch and user-friendly products to everyone

Work Experience

Web Intern
IMT Solutions   November 2023 - March 2024

Web Intern - Contractor
IMT Solutions   April 2024 - Now

Projects

eSchool Cambodia | Tech: React Native, TypeScript, Angular, .Net, SQL
(Working at IMT Solutions | Address: 55-57 Bau Cat 4 st, Ward 14, Tan Binh District, HCMC)
Mobile developer

- Developed an app and website for managing over 30,000 students and teachers in Cambodia.
- Implement important UIs such as "Update student profile", "Notifications", "Input score", etc. as well as their features.
- Experience in using Redux Toolkit and Redux Toolkit Query to handle API.
- Demonstrated adeptness in project coordination, fostering strong collaborations with team members, overseeing component management, structuring projects effectively, and adeptly handling data.

Netcompany Social Suggestion | Tech: MongoDB, NestJs, ReactJs, TailwindCSS
(Working at Netcompany | Address: Floor 24 in Opal Tower, 92 Nguyen Huu Canh st, Ward 22, Binh Thanh District, HCMC)
Frontend developer (4 people) | Demo | Github

- Developed responsive UI components for a Frontend website in Netcompany, aiding employees in discovering nearby places, supported by a 1000+ user base.
- Crafted key interfaces like "HomeScreen", "Search Location", and "Location Registration/Update", among others, for improved navigation and user engagement.
- Enhanced app efficiency and UX by architecting a Redux Toolkit-based state management system, reducing unnecessary re-renders.
- Integrated Pusher and Google Maps API for real-time notifications and location tracking features, adding dynamic content updates and geolocation services.

Bluelist18 | Tech: NextJs, Typescript, Tailwind CSS
Personal | Demo | Github
Description:

- Developed a music player that streams audio from YouTube videos via URL input, with playlist customization and loop functionality.
- Gained proficiency in NextJS and TypeScript, and learned to utilize the YouTube API for audio streaming on the web..

VF Corporation | Tech: HTML, CSS, Javascript
Personal | Demo | Github
Description:

- This is my first project that I have done since I started to learn about developing websites and it is a game-selling website

Certificates

Responsive Web Design | freeCodeCamp

Version Control | Coursera

Introduction to Front-End Development | Coursera

JavaScript Basic | Coursera

Extra Activities
